Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/3/2008 has been entered.

With the entry of the amendment filed on 11/3/2008, claims 1-8, 12-30 are pending in this application.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-8 and 12-30 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

This is a new matter ground of rejection, i.e. there is subject matter in the claims that lacks adequate descriptive support from the originally filed disclosure.

(1) New matter is in the description of maltodextrin when more than one maltodextrin is present. According to current claim language, when more than one maltodextrin is present, the dextrose equivalent of each individual maltodextrin is between 2 and 40 (see independent claims 1, 2, 22). **However, what is missing from**

such claim language is the additional limitation that the dextrose equivalent of the mixture is between 5 and 20. Originally filed disclosure required the mixture of maltodextrins to have the dextrose equivalent between 5 and 20 – see original claims 1-2 and specification page 2, lines 10-13.

(2) In new claim 28, the temperature is raised to solution boiling point, but the original disclosure only disclosed gradually raising to solution boiling point (paragraph 19 of the PG PUB).

Therefore, present claims contain new matter which fail to find adequate descriptive support from the originally filed disclosure.

Previously applied obviousness type double patenting ground of rejection over certain of the claims in copending 11/815,568 will not be maintained here because relevant claims have been canceled in that copending application. New claim 28 is noted in that application – applicant is requested to notify the USPTO in this application if claim 28 or any other claim in 11/815,568 is amended to recite specific maltodextrin oxidation product features.
